Work Experience

Divento Ltd.

DATA ANALYST INTERN

October 2021 - February 2022

Chester,UK

- I tested IOS & Android applications of the company periodically as Intern.
- I learned how to use Google Tag Manager & Google Analytics for Digital Marketing and Data Analysis
- I was analyzing the interactions between user and the app

Information Technologies and Communication Authority National Cyber Incidents Response Center

PENTESTER INTERN

September 2021 - November 2021

ABOUT ME**WORK EXPERIENCE****EDUCATION****CONTACT**

- Java
 - Android
 - C Programming
 - UML Diagrams
 - MySQL
 - JDBC Connection
 - IntelliJ IDEA
 - Google Analytics
 - Google Tag Manager
 - BurpSuite
 - B2-CI English Language Skills
-
- Learned web application penetration testing and ethical hacking through simulations and courses.
 - Learned machine penetration testing through simulations and courses.

See my complete work history and achievements on [LinkedIn](#).

The summarize of what I did during my undergraduate studies:

- I made an artificial intelligence-based project about Lung Cancer Detection with Convolutional Neural Networks.
- I improved my skills on Data Analysis (regression, boost algorithms, data clearing).I have developed a website engine that estimates housing prices for Istanbul.
- I have designed various management systems using Java, C, Python programming languages.I have Linux-based programming experience.
- I developed various simple games and communication applications using Android.
- I did my Summer Internship for 3 months as Penetration Test Training - Pentester at the Information Technologies and Communication Authority National Cyber Incidents Response Center. Afterwards, I had the opportunity to improve myself in the field of Digital Marketing,Data Analysis at Divento ltd.

Projects

Movit Friends App

MovitFriends is an application that allows you to communicate with your friends and aims to organize meet ups. In the project created using Shortest Path & Dijkstra Algorithms, the shortest path is calculated between two users. At the same time, there are various messaging screens with features such as seen, delivered, online.

Offline Sudoku Game(two players against each other) on Android

[ABOUT ME](#)[WORK EXPERIENCE](#)[EDUCATION](#)[CONTACT](#)

modes • Creating a leaderboard at the end of the game • Players can communicate through the chat section during the game. Used technologies: Android Programming with Java, Socket Programming, TCP-IP implementation, Singleton Design Pattern

Quick Biography

Sude Yüksek was born in Istanbul's Beykoz district, known as the “pearl of the Bosphorus” with its 18th and 19th-century houses and pretty, still largely unspoiled coastline, dotted with fishermen’s boats. She speaks French, English and Turkish fluently and writes in all three languages.

She took her first steps in coding at the age of 12 when she designed a 3D game. She is currently studying Computer Engineering at Marmara University in Istanbul.

Her hobbies include drawing, painting and reading the classics. She has explored 20 countries including several continents such as Asia, Europe and Africa, from Cape of Good Hope to Bangkok with her family, giving her the opportunity to meet different people and observe different cultures since her childhood.

When asked how she gets her inspiration as a developer, she answers that her favourite time to code, is “when I find a quiet place, where I can take small, gentle sips from a coffee thinking about the process in front of me and my past experiences; melting them into one unified solution, in a harmonious way, just as a perfect combination of nature and nurture”.
